Hello Bob.

Attached please find DEQ's comments, along with those from EPA and the City of Portland, on NW Natural's Draft Stormwater Source Control Measures and Performance Monitoring Work Plan. We understand that additional coordination is needed regarding the City permitting, that this is moving forward with a meeting at the City offices tomorrow, and which may result in additional changes to the plan. I look forward to coordinating to get effective stormwater measures implemented at the site. Please let me know if you have questions regarding DEQ's letter, timing going forward or any other aspects of stormwater source control at the site.
